CSA 2010...What You Need To Know

FMCSA will implement Comprehensive Safety Analysis 2010 (CSA 2010), which is designated to improve the efficiency and effectiveness of FMCSA's enforcement and compliance program.

How will this change affect drivers?

- ▶ Unsafe carrier and driver behaviors that lead to crashes will be identified and addressed
- ▶ All safety-based roadside inspection violations will count, not just Out-of-Service (OOS) violations
- ▶ Drivers will be more accountable for safe on-road performance

What can drivers do to prepare for the change?

- ▶ Know and follow safety rules and regulations
- ▶ Become knowledgeable about the new
- ▶ Behavior Analysis and Safety Improvement
- ▶ Categories (BASICs) and how FMCSA will assess safety under CSA 2010
- ▶ Keep copies of inspection reports
- ▶ Learn about employers' safety records

How can this change affect your PM program?

- ▶ Annual inspections & regular PM services will need to be performed on time
- ▶ Good historical documentation — including driver reported complaints are imperative

A Message From Our Leadership Team

Star Leasing Company is excited to offer our monthly newsletter as a feature of our new website. Our goal is to provide current, relevant information that is important to the transportation community. We will include CSA 2010 updates, specification and maintenance information, regulatory news, safety and wellness tips along with new technology reports. Please e-mail us at marketing.dept@StarLeasing.com with suggestions for future issues.

Safety & Wellness

Who's Responsible for Safety around Here? *By Mike Hensley*

Each and every one of us has a responsibility to actively care for our own safety, as well as the safety of those around us. This is consistent with our belief that safety is a "core value." At Star Leasing we believe everyone has the responsibility to promote safety by working safe and making sure anyone in the immediate area is also working safe.

What's New In Technology

UPS working on next generation of handheld devices

According to [Fleet Owner magazine](#), UPS is beginning the process of replacing the ubiquitous handheld devices with technology that offers more capability built into a smaller and lighter weight package. The new device offers: A color display and microprocessor; A color, auto-focus, flash camera; Faster wireless (Wi-Fi) support (600 mbps); A 2D imager; and On-the-fly switching between cellular carriers.
